Hello MeerMusik,

Quote:5. If someone knows this: I saw that you switched to a specific Clang Variant. Can I use the MinGW-w64 Compiler on MSYS2 as well?

I remember (at the time TheIDE swapped to Clang) using the MinGWw64 of MSYS2 to compile some of my project using U++ and TheIDE, all I did was creating a build method configured for it. For all reminded questions; I will let more empowered peoples awnser it
