Sorry, I have forgotten to tell u that CtrlCore.h need to be patched. Some program's access level need to be changed from "private" to "protected".

I have modified the traytest program to do the patch job.

Quote:tar jxvf trayicon20061010.tar.bz2

cd trayicon

./traytest

make

./traytest

Thank u for sending me the error codes. Though I can't read Spanish, it is still very helpful to me.
