You don't need this in C++ and you can add any non printable characters to U++ strings:

```
CONSOLE_APP_MAIN
```

```
{  
    String s;  
    s << (char)4;  
    Cout()<< "show " << s << EOL; // not show!
```

```
}
```

It will not be shown on terminal, but if you redirect the output to a file, it will be there.

```
./your_program > your_file.txt
```

or

```
your_program.exe > your_file.txt
```
