MeerMusik wrote on Sun, 18 April 2021 17:50 But what I really miss already in the Editor:

- \* No Text selected / marked: CTRL+SHIFT+Arrow Down or Arrow Up: Move the current single Line of Text (in which the Cursor sits) up or down

- \* Multiple Lines of Text selected: CTRL+SHIFT+Arrow Down or Arrow Up: Same but moves the whole selected Textblock up or down

This actually seems like a nice function, implemented in trunk (would be in nightly in 2 days, or you can checkout svn or git and compile your own).
