nicomesas wrote on Mon, 09 October 2006 20:13: Hey Luigi!

There are other version of test\_smtp. It does not need to link to "resolv" because I have downloaded the library code from opensolaris (<https://cvs.opensolaris.org/source/xref/on/usr/src/lib/libresolv2/>). May be work in windows?

The test program works ok in linux.

Nico

Ciao Nico,

I have added in c\_synonyms.h

```
#include <Core/Core.h>
```

to indicate where to find theunistd.h include, but I got the error:

" RTTI must be enabled !!! "

coming from Core.h file.

I do not know what it is.

Luigi
