Quote:Also let me know how to make that selection working

I made it work by calling, in LeftDown(unsigned int plIndex, PointGraph p, dword keyflags) a callback function.

I set this callback to what I need.

In you're case I think you should add a onSelectCB Callback.

In order to display properly, you just need to do a  
RefreshFromChild(GraphDraw\_ns::REFRESH\_FULL)

This is not optimal for performance : all gets redrawn (graph and graph data)
