Quote:does my recent fix for debugger/capture issue work in xwayland?

Yes, it works fine, here.

Edit: A correction. Grab works fine, but I have just noticed that either this fix or something else messes up the keyboard input for ALL U++ applications on wayland from that point on, if I stop the debugging. (Reverts the keyboard to US ASCII and this only happens for U++ apps.) Way to restore the kbd is to log out or restart the xwayland.

Edit 2: Ok, I can confirm that this fix breaks the keyboard input.

Best regards,
Oblivion
