Yes, it works fine, here.

Edit: A correction. Grab works fine, but I have just noticed that either this fix or something else messes up the keyboard input for ALL U++ applications on wayland from that point on, if I stop the debugging. (Reverts the keyboard to US ASCII and this only happens for U++ apps.) Way to restore the kbd is to log out or restart the xwayland.

Edit 2: Ok, I can confirm that this fix breaks the keyboard input.

Best regards,
Oblivion

Any suggestions? IMO this is bad but sort of acceptable... Or maybe it is possible to switch something back at the end of debug session?
