mdelfede wrote on Sun, 02 May 2021 18:40: For point 1 I can try it... just a question : the directives in import.ext are processed sequentially ?

I mean :

```
files somefolder/*.cpp;  
exclude somefolder/platforms/*;  
files somefolder/platforms/posix/*.cpp;
```

will pull in all somefolder cpp files, excluding somefolder/platforms folders but including somefolder/platforms/posix folders ?

Yes. I gave you a pointer to the code, did not I?

For point 2, I see it more difficult without tampering with all build system.

Yes. Which is probably a good thing.
