Tom1 wrote on Mon, 03 May 2021 09:51Hi,

I tried a fresh install of 2021.1 rc (15939), but it froze for several minutes on first startup showing progress 'Working: Search engines setup'. This is likely caused by my development computer not having an internet connection most of the time. Would it be possible to remove this requirement for internet connection from TheIDE? E.g. setup the search engines only on first search or something...?

I did not have this issue when recently installing 15931.

Best regards,

Tom

I have tried to make Cancel of that process much easier. Can you try with trunk? (Maybe with nightly tomorrow if you do not want to build it...)
