Hi,

When I insert Switch on the layout display is correct in IDE.

When I add ScatterCtrl to the project Display of LAYOUT in IDE is not ok.

It is error of Display in IDE only. Compiled program works fine with proper display of Switch.

I get following Error.

```
DrawOption: lambda.DrawOption(): DrawCircle: lambda.DrawCircle():  
/data/Development/upp_git/uppsrc/CtrlLib/CtrlLib.usc(528,40): invalid number of arguments in call  
to 'DrawCircle'
```
