Hello :)

I have thoses enum class :

TiledMap.h

```
enum class TiledOrientation{Orthogonal, Isometrique, IsometriqueEchelonne,  
HexagonalEchelonne};  
enum class TiledRenderOrder{RightDown, RightTop, LeftDown, LeftUp};  
enum class TiledType{Map};  
enum class TiledLayerType{TileLayer};
```

When starting to type "Tiled" in my code (in order to use thoses enum by example) I face this :

All the empty name are my enums, if I go on one of them, it work.
