Hello MeerMusik,

From what you describe, is it possible that you manually type "LabelBase" in the layour editor?

Because LabelBase is not itself a Ctrl. The correct ctrl should be Label or LabelBox. That's why you are getting the error.

Correct items are available under the right click (context) menu -> static submenu.

Or you can select or change them in the dropdown menu:

or you can type Upp::Label, if you prefer to edit the layout file manually.

ITEM(Upp::Label, Label1, SetLabel(t_("I am a
label")).SetAlign(ALIGN_CENTER).SetInk(Color(226, 42, 0)).LeftPosZ(281, 72).TopPosZ(93, 52))

Best regards,
Oblivion
.
