deep wrote on Sun, 06 June 2021 07:01Hi,

Is this feature available in current master.

Quote:

What it is for: this patch adds option -j to umk, which generates compile_commands.json (Compilation Database) next to a project file.

I do not think so. If you use Linux, I can post here a binary for Ubuntu, which is compiled about a year ago.

I use it myself.
