alex-t wrote on Thu, 05 August 2021 11:48 Yes, tail is system command. But I don't understand how it is launched from the IDE when I try to debug.

I activate Be Verbose checkbox. But I do not see any additional messages/logs.

Should be visible in bottom pane when you choose the right subpane (the one under closing cross).

May be I need to open some window or file? Where it write verbose logs?

It is used to create a terminal for console session.

Probably means your app is console one.

Can you try to debug something with GUI? E.g. examples/AddressBook
