Subject: Strings with national specific characters are wrongly sorted - Sort Posted by Klugier on Wed, 25 Aug 2021 11:01:50 GMT

Hello,

Today I found that sort returns wrong results in term of special characters:

```
#include <Core/Core.h>
using namespace Upp;
CONSOLE_APP_MAIN
{
   Sort(vec);
for (const auto s : vec)
   {
   Cout() << s << "\n";
   }
}</pre>
```

The results are:

Ala Edward Zbig

and should be:

Ala

Edward

Zbig

This is probably corner case, because this world doesn't exist in Polish, but anyway the error is there. I believe it is more serve when these character are in the middle of the string and we have a lot of such words.

Here is the article about Polish alphabet and the order of letters.
