Subject: Re: Strings with national specific characters are wrongly sorted - Sort
Posted by busiek on Thu, 26 Aug 2021 11:09:55 GMT

For Polish alphabet I use such function to map wchar into something comparable according to our needs:

```
auto CharRepr = [](wchar c)
{
    wchar d = ToLower(c);

    return MakeTuple(IsLetter(c), ToAscii(d), c);
};
```

Then, to compare, I map each WString into the appropriate vector of tuples.

Cheers,
Kuba
