1) Old problem with windres.exe:
x86_64-w64-mingw32-windres.exe -i "/home/ssg/dvlp/cpp/user/upp/amap/amap.rc" ...

There were errors.

I have an old version of umk where this problem is fixed. Maybe, I fixed it myself.

2) It would be good to store Upp code revision an app was built against, and output it in a "help"
message.
Upp has got a bmGIT_REVCOUNT macro. The problem is that git doesn't use revision numbers,
it uses hashes.
