hi,
i am trying to compile this simple code

```
#include "helloCurl.h"  
#include <curl_x86-windows/include/curl/curl.h>
```

```
helloCurl::helloCurl()  
{  
    CtrlLayout(*this, "Window title");
```

```
    CURL *curl;  
    CURLcode res;
```

```
    curl = curl_easy_init();
```

```
}
```

```
GUI_APP_MAIN
```

```
{  
    helloCurl().Run();  
}
```

but always get this error :

```
() : lld-link: error: undefined symbol: __declspec(dllimport) curl_easy_init
```

what im doing wrong ?
and what i have to do it right ?

thx

gabriele
