hi,
i am trying to compile this simple code

```
#include "helloCurl.h"
#include <curl_x86-windows/include/curl/curl.h>

helloCurl::helloCurl()
{
    CtrlLayout(*this, "Window title");

    CURL *curl;
    CURLcode res;

    curl = curl_easy_init();

}

GUI_APP_MAIN
{
    helloCurl().Run();
}
```

but always get this error :

```
() : lld-link: error: undefined symbol: __declspec(dllimport) curl_easy_init
```

what im doing wrong ?
and what i have to do it right ?

thx

gabriele
