Hi,

I seem to get a whole bunch of errors when compiling TheIDE after updating latest sources from GIT. This is just the beginning:

C:\lupp-git\lupp.src\uppsrc\Core\SIMD_SSE2.h(8): error C2668: 'Upp::_mm_storeu_ps': ambiguous call to overloaded function

c:/program files (x86)/microsoft visual

studio/2019/buildtools/vc/tools/msvc/14.21.27702/include\intrin.h(848): note: could be 'void

Upp::_mm_storeu_ps(float *, __m128)'

c:/program files (x86)/microsoft visual

studio/2019/buildtools/vc/tools/msvc/14.21.27702/include\xmmmintrin.h(345): note: or 'void _mm_storeu_ps(float *, __m128)' [found using argument-dependent lookup]

C:\lupp-git\lupp.src\uppsrc\Core\SIMD_SSE2.h(8): note: while trying to match the argument list '(float *, __m128)'

C:\lupp-git\lupp.src\uppsrc\Core\SIMD_SSE2.h(9): error C2668: 'Upp::_mm_store_sd': ambiguous call to overloaded function

c:/program files (x86)/microsoft visual

studio/2019/buildtools/vc/tools/msvc/14.21.27702/include\intrin.h(837): note: could be 'void

Upp::_mm_store_sd(double *, __m128d)'

c:/program files (x86)/microsoft visual

studio/2019/buildtools/vc/tools/msvc/14.21.27702/include\emmintrin.h(203): note: or 'void _mm_store_sd(double *, __m128d)' [found using argument-dependent lookup]

C:\lupp-git\lupp.src\uppsrc\Core\SIMD_SSE2.h(9): note: while trying to match the argument list '(double *, __m128d)'

...

The above seems fixable with adding 'Upp::' in front of each ambiguous _mm* call, but I'm not sure that's the correct way to deal with this.

I'm working on Windows with MSBT19x64.

Best regards,

Tom
