Subject: Re: How to migrate my old packages to new version U++ in linux
Posted by renyiyuan on Sat, 13 Nov 2021 10:46:07 GMT

I use the latest nightly build and in it all configuration files are moved to the self-contained .config directory in the upp folder, which is different from the old mode(I remember that the tutorial says that .bm and .var files are all located at upp root folder). So I think my original answer is
