Hi Mirek,

Thanks! Now it compiles without any errors. Just some warnings left with MSBT19x64 and MSBT19:

Utf.cpp

C:\upp-16111\ultimatepp-wchar\uppsrc\Core\Utf.cpp(136): warning C4927: illegal conversion; more than one user-defined conversion has been implicitly applied

C:\upp-16111\ultimatepp-wchar\uppsrc\Core\Utf.cpp(136): note: while calling the constructor 'Upp::WString::WString(const Upp::wchar *)'

C:\upp-16111\ultimatepp-wchar\uppsrc\Core\String.h(831): note: see declaration of 'Upp::WString::WString'

C:\upp-16111\ultimatepp-wchar\uppsrc\Core\Utf.cpp(156): warning C4927: illegal conversion; more than one user-defined conversion has been implicitly applied

C:\upp-16111\ultimatepp-wchar\uppsrc\Core\Utf.cpp(156): note: while calling the constructor 'Upp::WString::WString(const Upp::wchar *)'

C:\upp-16111\ultimatepp-wchar\uppsrc\Core\String.h(831): note: see declaration of 'Upp::WString::WString'

I will run some more tests tomorrow.

Best regards,

Tom
