Hi,

Thanks! It compiles OK now on Linux. :)

Just re-compiled TheIDE on MSBT19x64. I do not notice any slowdown when changing BM or ending build. (BM changes in about 1-2 seconds, and ending the build is just a flash.) This is the case when I'm working on a local SSD (M.2, ~3 GB/s).

However, when my project sources are on a local NAS behind a 1Gb LAN connection, the situation is different: Changing BM takes like 5-7 seconds and starting a build has a start-up lag of 7-12 seconds when nothing seems to happen. At the end of build there is not any significant delay though. Anyway, this is not any different to how it has been at 2021.1 release.

Best regards,

Tom
