Klugier wrote on Sat, 04 December 2021 19:49Hello Mirek,

I just did quick test with Emojies. It seems that most of it 90% are not rendered. Should it work like this at the moment? Example:

Platform: Linux/Manjaro - GTK. We could use https://openmoji.org/ emojies library.

Klugier

Worth investigating. Simple explanation is that you do not have proper emoji font on your system.

Please try same emojis with OpenOffice, then we will investigate further.
