Werner wrote on Sat, 14 October 2006 15:11 This is an updated and corrected version of a post which I had sent to Mirek.

After all the suggested change requires the modification of just 7 lines of code, 1 in "UppDlg.h":

...

and 6 in "Template.cpp":

...

```
case TEMPLATEITEM_TEXT: {  
    EditField *e = new EditField;  
    ctrl.Add(e);  
    break;  
}
```

Mirek,

as far as I can see, in modification block 1324 "Template.cpp" still needs the above-mentioned completion.

This is certainly my fault. In my first message (directly to you) I mentioned only 2 lines to be changed, but 7 lines would have been correct. Sorry.

Werner
