mirek wrote on Sun, 12 December 2021 17:41: The question now remains: When doing replacement, often some replacement font with black&white emoji glyph is closer in appearance than Color Emoji font. That results in mixing colored and B&W emojis. While technically probably more correct, should in case I am looking for emoji glyph always prioritize Noto Color Emoji (or maybe any color emoji font) over matching appearance of font?

Mirek

Hi,

Prioritizing color emoji would give the most consistent user experience on any desktop environment.

Best regards,

Tom
