Hello slashupp,

UppHub is available under TheIDE >= 2021.1 (stable)

- 1) In theIDE's main package selection screen, you'll see upphub button next to the new package button.
- 2) Also under TheIDE's Setup menu, you can see the UppHub menu entry. When you select it, a list of available (exta) packages should show up.

Best regards,  
Oblivion
