However, when I used gcc 9.4.0 (I compiled it from sources), the error has gone and installation went smoothly using adjusted Makefile to this gcc version.

busiek wrote on Thu, 23 December 2021 22:54Hi all.

I have the same error with build 16138. Using umk32 doesn't help.

I have Ubuntu 18.04.2 LTS. gcc 7.5.0. Processor is Intel(R) Xeon(R) CPU E5-2630 v4, so it is broadwell. What else do you need?

Kuba
