Hi Mirek,

There sure are better color artists than myself. Anyway, here's approximately what I have in mind. I've tried to follow Windows 11 default dark theme, but I just cannot get everything right.

Best regards,

Tom

EDIT: As there does not seem to be official dark theme colors available in Windows, anything that looks pretty much the same as dark built-in apps in Windows, is good enough for me. I have looked at Windows Explorer and Windows Settings primarily for the coloring.

EDIT2: Deleted the attachment. Please use the latest instead.
