Subject: Re: Assist++ typedef struct analysis problem
Posted by Lance on Sun, 27 Mar 2022 02:09:37 GMT

BTW:

```
struct Empty{};

struct Z {
    char c;
    [[no_unique_address]] Empty e1, e2;
};
```

Above c++20 code will confuse assist++ too. I wasn't able to figure a way to fix it.
