ide now compiles with C++ 20 with some warnings. If anybody had time to investigate these, it would be much appreciated...

C:\u\upp.src\uppsrc\RichText\ParaData.cpp (344): warning: ISO C++20 considers use of overloaded operator '!=' (with operand types 'const WithDeepCopy<Vector<Upp::RichPara::Tab>>' and 'const WithDeepCopy<Vector<Upp::RichPara::Tab>>') to be ambiguous despite there being a unique best viable function [-Wambiguous-reversed-operator]
