Hello Sayem,

Quote:Thank you very much. It puts up a lot of burden

Yes that's true. For Linux it is reading /usr directory and for Windows it reads "C:/". All these directories have a lot of files. If you want to limit that behaviour just replace following lines with appropriate directory in the example:

```
#ifdef PLATFORM_WIN32
    String dir = String(GetExeFilePath()[0], 1) + "\\";
#else
    String dir = "/usr";
#endif
```
