Bazaar(uppHub) thing:
i suggest - don't throw away Bazaar archive - it has a lot of usefull code.
I didn't for example found Serial package or non-bazaar FontSel(dialog)
in uppHub(maybe i overlooked something), which are mostly just copy/paste
packages - since all works out of the box.

For Serial bazaar package i just added this, to adjust a few things,
for linux, i am not sure if this is needed or how it's done.

```
 void SetWriteTimeout(dword ms){
   COMMTIMEOUTS ct;memset(&ct,0,sizeof(ct));
   ct.WriteTotalTimeoutConstant=ms;SetCommTimeouts(fd,&ct);
 }
 void SetTimeouts(dword msRead,dword msWrite){
   COMMTIMEOUTS ct;memset(&ct,0,sizeof(ct));
   ct.ReadIntervalTimeout=ct.ReadTotalTimeoutMultiplier=MAXDWORD;
   ct.ReadTotalTimeoutConstant=msRead;
   /*ct.WriteTotalTimeoutMultiplier=MAXDWORD;*/
   ct.WriteTotalTimeoutConstant=msWrite; SetCommTimeouts(fd,&ct);
 }
```

Why do not you start UppHub package for serial?

Seriously, the problem with bazaar was that while it contained a lot of great code, 90% of it was unmaintained.
