Oblivion wrote on Sun, 26 June 2022 12:53Hello Mirek,

I've succesfully compiled the branch on Linux, however, it doesn't seem to work at all. (No assist/code completion, etc...)

(Linux 5.18, GNOME 42.1 (Wayland), LLVM/CLANG 13.0.1 (x64))

Keep in mind that this was just a quick test, Later I'll do some more...

Best regards,
Oblivion

Probably RedefineMacros() function problems - in linux, I believe it should not be there at all.
