Hi,

I must be missing something here... Compilation fails with:

```
C:\upp-git\upp.src\uppsrc\ide\clang\clang.h (5): fatal error C1083: Cannot open include file:
'clang-c/Index.h': No such file or directory
```

Best regards,

Tom

EDIT: This is on Windows using MSBT22x64 and the same happens with CLANGx64.
