Novo wrote on Sun, 03 July 2022 16:19I checked a clang-enabled version of TheIDE in Linux (debug version).

It is using 100% of CPU all the time. Initially, I thought that this is Clang indexing UPP files, but after waiting for 50 minutes I figured out that this must be a bug with TheIDE.

Yeah, that is temporary issue, it is fixed in latest version (hopefully).

Mirek
