It seems like the Makefile for theIDE is out of date:

It asks for files that aren't included in the uppsrc, like Draw/PixelArray.h and they aren't listed in Draw.upp.

So i guess the zip-archive contains all needed Files.

[update:]  
at the beginnin of the Makefile:

OutFile = /home/cxl/ide

should be

OutFile = \$(OutDir)ide

Bas
