Subject: Just want to set the text of window
Posted by mrk10000 on Mon, 11 Jul 2022 01:14:35 GMT

Why i cannot just set the windows text, it throws an exception, i have tried TopWindow->GetTitle, i look for examples but there is not one having child calling parent GetTitle or SetTitle

```
String tmp(this->GetTopWindow()->GetTitle().ToString() );
LOG(tmp);
```

The current layout was added to a parent TabCtrl with .Add
