ok! very good! now work with command "dir".

"Sys" on windows 10, no console window opens!

```
CONSOLE_APP_MAIN
```

```
{  
    String output;  
    Sys("cmd.exe /c dir c:\\temp", output);  
    Cout() << "aqui " << output << EOL;  
    Vector<String> lines = Split(output, "\\n");  
  
    int i = 1;  
    for(auto& line : lines) {  
        Cout() << Format("Line #%d: %s\\n", i, line);  
        i++;  
    }  
}
```
