I want a condition for 2 buttons

```
if ( button1 clicked && button2 clicked)
{
    instructions
}
```

Do you have any adeas

thanks

Hello Mesimo

You can use "Option", that is the check box in U++.  
For example, if option1 and option2 have been declared as Option, you can do:  
if (option1 && option2) {  
 Do  
}
