Hi,

I had to move `#include <X11/Xlib.h>` in `GtkApp.cpp` in order to compile in Windows with clang:  
`#include <CtrlCore/CtrlCore.h>`

```
#ifdef GUI_GTK
#include <X11/Xlib.h>
#define CATCH_ERRORS 1
```

Additionally, compilation fails to missing include in MSBT22x64:

C:\upp-16323\upp.src\uppsrc\ide\clang\clang.h (5): fatal error C1083: Cannot open include file:  
'clang-c/Index.h': No such file or directory

Best regards,

Tom
