Hello deep,

Everything works for me on the latest version and all packages that are in nests.json are available. Can you post more details? Screenshot etc..."

Also, this link https://raw.githubusercontent.com/ultimatepp/UppHub/main/nes ts.json works for me.

The only problem I see that there might be a time when GitHub will not be available. Achiving 100% reliability is imposable, but if GitHub doesn't work it means that packages can not be downloaded either. I think we should analyze our error handling for such error to at list display that GitHub is unavailable.

-----

Edit: I updated TheIDE UppHub code. Now, it detects and show prompt if any network error occurs during downloading nests.json file. It is very unlikely scenario, but might happen.
