Hello Klugier, glad you like what I'm doing

The reason why I have rather small charsize is because I want it to fit on 4 pages, so max. 2 printed pages recto/verso.

How I use them:

- or on the second screen with full screen PDF: okay to read, also the code examples (I do have 4K screen, hope it also is fine to read on FullHD);
- or I use the printed version color laser 1200dpi: also okay but need good eyes indeed ;
- or one can print them out and scale-up to A3, I tried this today and looks great. In this way you can put them on the wall for reference or decoration

Keep on doing the good work... still love U++ as day one.
