Subject: Re: theide with libclang
Posted by peterh on Sat, 15 Oct 2022 09:33:48 GMT

libclangd seems to have a problem with header files.
It expects a "}" at the end of the header file and it thinks the opening bracket is at a negative line number.
I see this with other header files too.
Upp Version 16497 on Windows 10 64 bit.

In "CurrentContext.cpp" there is no matching bracket for
namespace Upp {
