Thank you, Mirek. I will test it when github/ultimatepp is updated.

BTW, "Find" now works fine in UPP.16523 like I have reported yesterday.

And yes, I also had a mysterious theide-crash-on first-run-then-works-fine-afterwords experience. I accidently updated a upp.16470 src and built theide from there, on first run, it crashed with invalid-memory-access. Strange.
