zsolt wrote on Tue, 22 November 2022 08:28Thanks for your work.

A problem: Alt + C is not working now. It starts an endless "Parsing" and doesn't copy anything to the clipboard.

Works for me. Endless "Parsing" would mean that current file parser never stops.

Does it do that always? If yes, can you post more info so that I can reproduce?

Does autocomplete work? (That is basically the same parsing thread).
