Subject: U++ Discord Server

Posted by Klugier on Sun, 27 Nov 2022 16:05:03 GMT

Hello,

After spending some time with Discord, I decided to create server dedicated to U++. I know that somebody of you complaining about it in some posts and some of you are already there. It might serves us well as a substitution to our forums and GitHub. Some of our direct competitors has there servers, too. We can not be behind them ;)

If you want to join here is the invitation link.

I am aware that our Slack is already dead, so maybe we will have more luck with Discord :)
