shawnx wrote on Mon, 28 November 2022 16:47 That sounds cool, when will it be available?

The plan is to enter "beta" stage at 2022/1/1 and hopefully call it a release by the end of year.

Usually the process is "take nightly build and call it rc[n]". When serious bugs are reported, fix and call it rc[n + 1]. Once nobody complains about it, delete rc bit from the name

Current nightly is good enough for serious development work.
