The problem is that anboto package uses BSTRSet() function which is not included in cross compile clang environment.

I'll try to correct it and send a pull request.

BTW, IMHO we shall try to cross build everything, as I found also many lettercase problems in #includes, in UppHub packages.

For example

```
#include <Winiocctl.h>
```

Doesn't compile in cross compile (case sensitive) environment and should be replaced with

```
#include <winiocctl.h>
```

There are many of such cases.
